Firetail[®]

25TH ANNIVERSARY

TVAN | Firetail®

THE FUTURE IS BRIGHT

A WORD FROM OUR DIRECTOR

25 years can go by in a blink of an eye. It has been a very satisfying adventure, never easy, but always was worth it.

I first came to know TRACK in the early 1990s, when I began daydreaming about exploring the outback. Being a Mechanical Engineer I was drawn to TRACK because it clearly built the best, but far from cheapest, off-road camper on the market.

After making the decision to invest in a TRACK my family and I opened maps of Australia and we didn't look back. Thinking about it now, they are probably some of our family's happiest memories.

Fast forward to 1998, I found myself looking to improve our family camping further and my wife was keen to move away from canvas over the bed and the soft floor tent of our TRACK Eagle. I struck up a friendship with the then owner of TRACK, the late Alan Mawson, and we collaborated in defining the Tvan product, designing its iconic lines and engineering its mission critical features. A process that would redefine the camper trailer market.

By the time we first revealed the Tvan to the market it was late 1999. The Tvan won its first accolade as the "Camper of the Millennium". It was a great honour to share the award and success with my friend Alan. The Tvan went on to win other awards, but more importantly it won the hearts and minds of a generation of adventurous travellers.

Tvan owners ultimately helped us define our company vision that TRACK would 'Create & Develop RVs that Inspire Adventurers and Enthusiasts' which nowadays is simply "RVs that Inspire".

At TRACK hardly any of our TRACK designed parts are carried over to the next model. We are keen to build on our legacy, but also don't want to limit our ambition and risk diminishing the design and performance improvements each model can offer over its predecessor. So, what carries over is DNA, design systems, know-how and experience.

From a distance every Tvan looks similar with its stand out shape and signature window and deck, but up close you will see that the MK1 and the MK5 are 25 years apart in design and materials, usability and tow-ability, with new iterations of our famous MC2 Suspension.

I am proud of TRACK and I am grateful to the team of people who helped us build this business. We have always reinvested in our company, people and products.

Our customers understand this and can easily see how their feedback inspires us to make improvements.

We do not know what the future holds. The only thing certain is change and we aspire to lead in the technology and innovation that shapes the future of our industry.

Gerard Waldron
Director & Enthusiast

TVAN

TRACK.
"RVS THAT INSPIRE"

AUSTRALIA'S MOST ICONIC AND ENDURING GENUINE OFF-ROAD CAMPER TRAILER

In 1999, TRACK entered the all new Tvan in the Camper Trailer of the Millennium awards held by the Recreational Vehicle Manufacturers Association and won its class.

The Tvan quickly became the industry benchmark for off-road reliability and functionality and has continued to gain industry recognition. Tvan has won multiple Camper Trailer of Year awards and most recently won the 'Best Build Quality' award for the MK5 Tvan.

Since 1999, the Tvan has developed a formidable reputation as the most reliable and refined camper on the market. TRACK has always listened to customer feedback and sought to reinvent the Tvan with new innovations and unparalleled engineering.

TRACK has worked hard to uphold its vision, to create "Recreational Vehicles that Inspire" and the Tvan is right at the heart of the company.

For this reason, TRACK has remained a 100% Australian family owned business and has ensured that the vast majority of components are manufactured by other Australian businesses.

To celebrate 25 years of Tvan, TRACK has created two very special FIRETAIL, limited edition models.

The first special edition FIRETAIL echoes the simplicity of our MK1 (with a few modern luxuries!), while the FIRETAIL SPARK showcases our most recent innovations.

Both packages stand out from the crowd with striking new colour schemes and custom FIRETAIL decals, all while representing excellent value for money.

THOUSANDS OF CUSTOMERS & MILLIONS OF KILOMETRES TRAVELLED

Firetail

The FIRETAIL highlights and acknowledges the first generations of the Tvan, which broke new ground in performance and amenity by integrating only the necessary and sufficient to achieve a great camping experience. Another major benefit of these early Tvans was the unrivalled and ultra-light towing weight.

The FIRETAIL is designed to be the perfect step up for a conventional camper trailer owner. This package features a very desirable specification, is lightweight and represents outstanding value. Additionally, there is plenty of opportunity to select from the full range of Tvan options to upgrade and customise features to suit all camping styles.

FIRETAIL Special Edition is packaged with:

- Exclusive Desert FIRETAIL colour scheme including custom FIRETAIL DECALS
- Front boot: Equipped with two sealed lockers. The LHS locker comes standard with a sliding fridge drawer, insulation, 12V power and venting. The RHS is fitted with a pressure switch activated LED light.
- Diesel hot water and heating
- Jet Grey Canvas – changes all standard canvas to Jet Grey for a sleek and modern look
- 120W rooftop solar panel
- 25A battery charger
- 40A Redarc BC-DC
- 1x 125Ah Lithium LiFePO4 battery – Revolution Eco (100Ah usable, 500W total draw)
- Battery management display
- 4 x USB sockets alongside bed (2x each side)
- Roof storage system
- Side-wall storage pockets
- Under mattress liner
- 3-speed fan with timer
- Quick Cover™ Swing out awning

HUGE SAVING OF \$5,018 OFF RRP

Firetail Spark

The FIRETAIL SPARK is a statement about the future and showcases some of TRACK's most outstanding product innovations. These new innovations, introduced on the MK5 Tvan, highlight TRACK's passion for enriching your camping experiences.

This Special Edition Tvan is a great upgrade for existing high-end camper trailer owners, who have refined their requirements over several trips or for those who want to start at the top. This unit features some serious power system upgrades, opulent kitchen, premium wheels and class-leading load capacity with upgraded GVM suspension and brakes. This is arguably the most desirable combination of camper trailer on the market.

Additional to the standard FIRETAIL, the FIRETAIL SPARK Special Edition is packaged with:

- Exclusive GOLD FIRETAIL colour scheme with two other highlight colours to choose from
- Front boot: Equipped with two sealed lockers. The LHS locker comes standard with a sliding fridge drawer, insulation, 12V power and venting. The RHS is also fitted with a slide out drawer with tie down points and a pressure switch activated LED light. Fitment includes the 'drawer swap' option making allowance for larger/longer fridges on the kitchen side
- Diesel hot water, heating, shower point & ensuite tent
- Premium kitchen
- Kitchen fitted power outlets (2x 240v)
- 2 additional tent windows & vent under bed
- 1.8T suspension upgrade inc. 12" electric brakes
- Bump stops to suit 33" diameter tyres
- Alloy wheel upgrade 17x8

SPARK Power Pack consisting of:

- 2x Projecta 100Ah Lithium batteries
- Redarc 2000W Pure Sine Wave Inverter
- Redarc RedVision + Manager 30
- Redarc Rogue TVMS 40A control and distribution
- Upgraded roof-mounted 200W Solar Panel
- Updated lower body sheet-metal kit

HUGE SAVING OF \$6,840 OFF RRP

STANDARD FEATURES

While each variant of the FIRETAIL's front boots vary slightly – preferencing weight saving and simplicity in the standard version, while the SPARK looks to improve the overall functionality by providing a larger fridge slide and additional slide for gear storage – both can be further configured at time of order to suit your personal needs.

The Quick Cover awning is a testament to what makes a Tvan so good! It is fast, flexible and easy to use.

You can set it up roadside or at a campsite to quickly cover your kitchen while you make lunch, dinner or a snack, then it disappears neatly into the roof top bag until next time.

Yes, you can still get the full annexe with all the enclosable walls and they still work brilliantly with the Quick Cover packed away. But in most cases, the speed and flexibility of this awning make it exceptional for daily use.

DIESEL HEATING AND HOT WATER

TRACKs premium diesel heating and hot water system is standard on both models of the FIRETAIL. The system utilises high quality Wabesto components incorporated with purpose-built TRACK plumbing, fuel tank and external housing that condenses the main components down to a jerry can sized unit.

This install is unique to the industry and saves space, weight and exposure of plumbing lines to the elements. On both models hot and cold water is available at the sink and heating inside the cabin.

If the ensuite tent is added (standard in the SPARK) the unit also comes with an external flick-mixer for showers.

FIRETAIL

COOKING CONFIGURATIONS

FIRETAIL KITCHEN

- Stainless topped, aluminum kitchen and workbench with built in windshields
- Compact weight saving design, preferencing space in the gear carrying locker
- Twin burners
- Extra sturdy slideout design
 - no support legs needed
- Tunnel pantry – accessible from both sides
- Sink, electric water pump and large cutlery drawer
- Hot and cold water

FIRETAIL SPARK KITCHEN

Occupying a 30% larger locker than the Classic Kitchen, the Premium Kitchen for the Tvan MK5 features twice the bench space.

The stainless steel benchtop uses advanced sheetmetal techniques for a premium feel, including rounded edges. The powder coated, predominantly aluminium body makes access to storage a breeze incorporating many drawers for storage of all your kitchen needs.

The Premium Kitchen boasts a 3 burner (2x1.5KW, 1x2.5KW) glass topped stainless steel cooktop with piezo ignition and matching stainless steel sink with flick mixer tap, draining board and cutlery drawer located below.

The kitchen features a single handed operation to lock in and out on TRACK's own design ball bearing runners, while the integrated windshields are deployed by simply raising them into position.

Spark

THE SPARK POWER PACK

Exclusive to the FIRETAIL SPARK or optioned on the standard FIRETAIL. Featuring 200Ah of high output lithium batteries, and 200W of roof mounted solar with an auxiliary input for portable blankets, the FIRETAIL SPARK is designed to power your daily necessities – **like a good cup of coffee in the morning? or Starlink™ to check the news?**

This is all achieved thanks to a revolutionary new Tvan lower body design that brings all the key electronics together to reduce voltage drop and improve safety with cut off switching.

Featuring Redarc's RedVision and the new Rogue Total Vehicle Management System (TVMS), the SPARK will have you in control, harnessing its power to run up to 2000W of devices at 240V, inside the cabin or at your kitchen.

Yes – you can upgrade your standard FIRETAIL by choosing the 'SPARK Power Pack' from the options list. If you're after more lithium capacity, induction cooking or faster charge rates you can further option your SPARK with the 'Lightning Power Pack'.

THE POWER OF

REDARC®

The SPARK's redesigned electrical system relocates the batteries and management systems more centrally than most other Tvan models, which means the SPARK now comes with lockable storage panniers, and a handy little cubby where the old control systems used to be.

TRACK also offers unique sheetmetal underbed drawers (lockable) to help get you organised. And there's also an option to increase solar capacity by installing a 160W blanket on the Tvan's rear hatch.

**OPTIONAL
DRAWERS**

**OPTIONAL 160W
HATCH MOUNTED
SOLAR BLANKET
AND FAMILY ROOM**

MC2[®] ASSYMETRIC LINK SUSPENSION

All TRACK RVs are built on our compact and strong hot dipped galvanised chassis.

Our Asymmetric Link independent suspension is unique. It maintains wheel contact with the ground, even over severe corrugations or deep washouts, thanks in part to the tough cross link that manages bump steer.

The industry benchmark 230mm wheel travel is achieved by the custom springs & shockers, which when coupled with the front trailing arms ensure the van tracks straight behind the tow vehicle, even over the toughest terrain.

The MC2 Suspension[®] takes its name from the Australian Military specification.

'Mobility Category 2' is the highest performance rating for an unpowered vehicle. This remains unmatched by any other domestic trailer suspension system and delivers a significantly softer and flatter ride all round.

JUST ADD LIGHTNESS?

A difference of 500KG in weight could increase your fuel consumption figures by up to 25%. If you tow at 16L/100km on a trailer weighing 1500KG normally, a trailer weighing in at 2000KG could tip that to around 20L/100km.

That could cost you almost \$200 extra in fuel alone for a return trip from Sydney to

Melbourne and shorten your typical 80L fuel range from 500km to 400km, meaning you have to carry extra fuel and weight on remote trips to ensure you can make it between fuel stops.

Imagine the difference that weight would make on a lap of Australia!

YOU CAN'T ADD LIGHTNESS OR STRENGTH. IT NEEDS TO BE A PART OF THE DESIGN FROM THE OUTSET.

Reducing weight without sacrificing strength and durability is a difficult challenge in a Camper Trailer / Caravan, but it is absolutely possible with good clever design and consideration.

Because the core of TRACK's DNA is all about weight management, the design team deliberately utilise lighter (and often more expensive) materials such as aluminium, where steel would commonly be used.

In fact, all of TRACK's designs prioritise this methodology with custom aluminium walls, cabinetry and trims. As a part of the design update between the MK3 and MK4 model Tvan, the engineering team was able to remove more than 50kgs of weight, while providing significantly more flexible storage and bed space.

Ideally and always you'll want the lightest possible trailer without sacrificing comfort. - We think the Tvan has everyone else beat!

OUR MOST RECENT AWARD AND WHAT IT MEANS FOR YOU!

TRACK is not new to winning accolades for its various products and indeed neither is the Tvan with 6 industry-based awards including the “Camper Trailer of the Millennium” upon its release in 1999.

It was no surprise then when Tim Van Duyl (Camper Australia Creative Director) called to break the news that the Tvan Lightning had been recognised for what TRACK does best – “Build Quality”.

Winning the award for “Best Build Quality” is a significant achievement and acknowledgment from Camper Australia and this too brings several benefits for TRACK customers:

1. Assurance of Quality: This award signifies that the TRACK Tvan has been recognised as a camper trailer with exceptional build quality. This recognition gives customers confidence that they are purchasing a product of high standards and superior craftsmanship.

2. Reliability and Durability: A camper trailer with excellent “build quality” is expected to be reliable and durable. This means that the Tvan is constructed using robust materials and precise manufacturing techniques, ensuring that it can withstand the rigours of off-road adventures and challenging environments.

3. Enhanced User Experience: The “Best Build Quality” award shows that TRACK has paid attention to every detail of the Tvan’s design and construction. This attention to detail translates into a more comfortable and user-friendly experience for customers. They can expect thoughtful features, well-finished interiors, and functional spaces that enhance their overall enjoyment while using the camper trailer.

4. Longevity and Resale Value:

A well-built camper trailer is likely to have a longer lifespan and retain its value over time. TRACK customers can expect that their Tvan will last for decades, providing them with many enjoyable camping experiences. Additionally, should they decide to sell or upgrade, the recognition of the Tvan’s “Best Build Quality” will translate to a better resale value.

5. Industry Recognition: Winning an award at a prestigious event like Camper Trailer of the Year demonstrates that TRACK stands out among its competitors. It reflects the company’s commitment to producing high-quality products and its ability to meet or exceed industry standards. This recognition instils pride in TRACK customers, knowing that they have chosen a top-rated camper trailer.

“When you head outback there are certain brands you see more of and (the TRACK) Tvan is definitely one of them and it’s because of that build quality that reliability you get.”

Tim Van Duyl – Camper Australia Creative Director

“Spend any time on Australia’s remote Outback back tracks and Tvan is the camper that you’ll see time and time again. This Australian designed, owned and manufactured camper has been a leader in its category for over 23 years!”

Kath Heiman – CTOTY 2023 judge

TVAN | Firetail

The FIRETAIL models, specifications and price points have been honed specifically to provide the 'best value' packages within the Tvan range.

These special editions also serve as a reminder that the Tvan created its own product segment back in 1999, for customers seeking high quality and easy to use off-road campers, with real credibility embedded in the core design.

And, in essence, that's what a Tvan has always been from the very beginning. TRACK engineers have always preferred ergonomic design with a 'customer first approach' placed above all other metrics including 'price saving' with cheaper components or heavier cost-cutting designs.
