NOMADIC
OFF-ROAD CAMPERS AUSTRALIA

XPS CONSTRUCTION

Modern Construction Methodology

NO TIMBER
NO HEAVY FRAMING
NO SEAM LINES
NO WATER INGRESS
NO MOULD

XPS foam core construction delivers outstanding thermal insulation, excellent strength and significantly reduced weight—without the rot risk of timber or thermal bridging associated with alloy frames.
Moisture-resistant, durable and quiet, it creates a more energy-efficient caravan engineered to handle tough Australian conditions and years of off-road adventure with confidence.
